REASONS FOR ALLOWANCE

1. Claims 1-5, 8-12, 14-16, 18-20, 28 and 29 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

In regard to claim 1, the prior art of record fail to teach a controller of an electrical machine having a rotor and at least one electrically energisable phase winding, the controller comprising a memory storing a predetermined advance angle profile and a predetermined angle correction factor distinct from the predetermined advance angle profile, wherein the predetermined advance angle profile represents energisation of the phase winding with respect to angular position of the rotor over a range of rotor speeds and the controller is configured to apply the predetermined angle correction factor to a portion of the predetermined advance angle profile that covers a range of different rotor speeds

In regard to claim 9, the prior art of record fail to teach a method of generating a control map for a controller of a machine having a rotor and at least one electrically energisable phase winding, the method comprising:

producing an advance angle profile representing energisation of the phase winding with respect to the angular position of the rotor over a range of rotor speeds; producing an angle correction factor, distinct from the advance angle profile, for a portion of the advance angle profile that covers a range of different rotor speeds, wherein the angle correction factor depends on a difference between the measured input power and a predetermined input power, and storing the advance angle profile

and the angle correction factor in a memory associated with the controller and in combination with the other limitations of the base claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
